

A CSV file is a table written as text

the file (plain text)

```
name,cgpa,placed  
Asha,8.1,yes  
Ravi,5.4,no  
Meena,7.0,yes
```

read_csv

what pandas builds

name	cgpa	placed
Asha	8.1	yes
Ravi	5.4	no
Meena	7.0	yes

first line: the **header**
(column names)

, the separator between values;
one line = one row

a **TSV** file is the same,
with a tab instead of a comma
