

api.exchangerate-api.com/v4/latest/INR

```
{  
  "provider": "https://www...",  
  "base": "INR",  
  "date": "2026-10-03",  
  ...  
  "rates": { "INR": 1,  
              "USD": 0.0104,  
              "EUR": 0.00923,  
              ... }  
}
```

pd.read_json

DataFrame (one row per currency)

	provider	base	date	...	rates
INR	https://...	INR	2026-10-03	...	1
USD	https://...	INR	2026-10-03	...	0.0104
EUR	https://...	INR	2026-10-03	...	0.00923
...	https://...	INR	2026-10-03	...	...

keys inside "rates" → row labels (the index)

top-level keys → columns

single values (base, date, ...) are repeated in every row
