

**MLP**

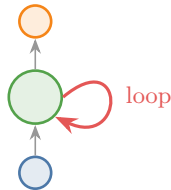

layers of perceptrons;  
tables, regression,  
classification

**CNN**

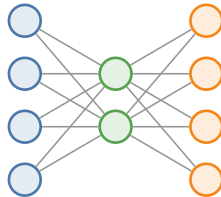

a filter slides over  
the image;  
images, video

**RNN / LSTM**

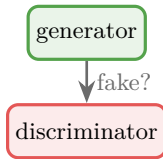

output fed back;  
text, speech,  
time series

**Autoencoder**

narrow middle;  
compress without  
losing quality

**GAN**

two networks compete;  
new faces, music,  
stories
