

Two vectors span a plane; a third vector either lies on it or leaves it

- $\mathbf{v}_1 = [2, 0, 1]$
- $\mathbf{v}_2 = [0, 2, 1]$
- $[2, 2, 2] = \mathbf{v}_1 + \mathbf{v}_2$: on the plane, dependent
- $[0, 0, 2.5]$: off the plane, independent
