

While learning

Ready-made CSV file
(Kaggle, course material)

download

In a company

Call an API
a service returns data on request

collect ourselves

Web scraping
code extracts data from web pages

Our dataset

```
graph LR; A[Ready-made CSV file (Kaggle, course material)] -- download --> D[Our dataset]; B[Call an API a service returns data on request] -- collect ourselves --> D; C[Web scraping code extracts data from web pages] --> D;
```

The diagram illustrates three ways to obtain a dataset. A blue box labeled 'Ready-made CSV file (Kaggle, course material)' has an arrow labeled 'download' pointing to a green box labeled 'Our dataset'. Below this, under the heading 'In a company', are two orange boxes. The first, 'Call an API a service returns data on request', has an arrow labeled 'collect ourselves' pointing to the 'Our dataset' box. The second, 'Web scraping code extracts data from web pages', also has an arrow pointing to the 'Our dataset' box.
