

1–2. build and read
Overview, Alerts, each
variable, Interactions,
Correlations,
Missing values

```
graph LR; A["1–2. build and read<br/>Overview, Alerts, each<br/>variable, Interactions,<br/>Correlations,<br/>Missing values"] --> B["3. write down<br/>“Cabin is 77% missing”<br/>“Pclass and Fare<br/>are strongly linked”"]; B --> C["4. turn into tasks<br/>columns to drop,<br/>missing values to<br/>fill, outliers to check"]
```

3. write down
“Cabin is 77% missing”
“Pclass and Fare
are strongly linked”

4. turn into tasks
columns to drop,
missing values to
fill, outliers to check

the report lists facts; we decide what they mean
