

Shear first, then rotate

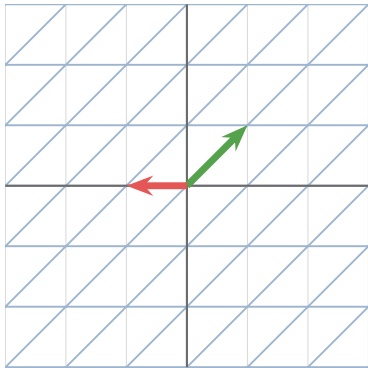

$$RS = \begin{bmatrix} 0 & -1 \\ 1 & 1 \end{bmatrix}$$

$\hat{i} \rightarrow [0, 1], \hat{j} \rightarrow [-1, 1]$: close together

Rotate first, then shear

$$SR = \begin{bmatrix} 1 & -1 \\ 1 & 0 \end{bmatrix}$$

$\hat{i} \rightarrow [1, 1], \hat{j} \rightarrow [-1, 0]$: far apart
