

Seven questions for a new dataset

1. How big is the data?

`df.shape`

2. What does it look like?

`df.sample(5)`

3. What type is each column?

`df.info()`

4. Are there missing values?

`df.isnull().sum()`

5. What does it look like in numbers?

`df.describe()`

6. Are there duplicate rows?

`df.duplicated().sum()`

7. How are the columns related?

`df.corr()`
