

parameters

`Input(shape=(100,))`

(batch, 100): 100 word ids

320,000

`Embedding(10000, 32)`

(batch, 100, 32): one vector per word

190

`SimpleRNN(5, return_sequences=True)`

(batch, 100, 5): one hidden state per time step

55

`SimpleRNN(5)`

(batch, 5): the last hidden state only

6

`Dense(1, activation="sigmoid")`

(batch, 1): the prediction
