

feature 2

$$b - a = (3, 3)$$

$$(3, 3) \cdot (3, 3) = 3 \cdot 3 + 3 \cdot 3 = 18$$

$$d = \sqrt{18} \approx 4.24$$

3 features: (1, 2, 3) to (4, 5, 6)

$$(3, 3, 3) \cdot (3, 3, 3) = 27, \quad d \approx 5.196$$

same code, one more term
