

```
{
  "id": 1,
  "name": "Under the Dome",
  "rating": {"average": 6.6},
  "weight": 100, ...
}
```

`pd.DataFrame(shows)`

id	name	rating
1	Under the Dome	{'average': 6.6}

a dictionary in one cell

`pd.json_normalize(shows)`

id	name	rating.average
1	Under the Dome	6.6

a number we can plot
